

# DUPONT WEATHERIZATION SYSTEMS COMMERCIAL CERTIFIED INSTALLER PROGRAM

Support and peace of mind  
with every product installation.

DUPONT®

Tyvek.

# Gain the confidence that comes from a job done right.

**DuPont Weatherization System products provide quality protection and help to improve the energy efficiency of the buildings you design and build. By working with a DuPont Weatherization Systems Certified Installer, you gain the peace of mind knowing that your products will be installed per manufacturer specifications, with less risk of installation related issues or callbacks.**

The DuPont Weatherization Systems Certified Installer Program is one more way to put the building science expertise of DuPont right at your fingertips. DuPont Weatherization Systems Certified Installers go through a comprehensive training session and audits conducted by a DuPont™ Tyvek® Specialist, receiving instruction on proper installation techniques and safety practices. A Certified Installer acts as an on-site DuPont™ Weatherization products installation expert, able to provide installation services to help seal the building envelope.

A DuPont Weatherization Systems Certified Installer works with you to help ensure you receive dependable, high-quality installation services, which may help reduce your overhead and construction cycle time. You can rest assured that the buildings you design and build with DuPont Weatherization Systems products will offer added protection and improved energy efficiency for years to come.

DuPont Weatherization System products are the world's leading weather resistive barriers, offering the best balance of product properties and may help in earning USGBC's LEED® points. All DuPont™ Tyvek® products work together to help seal the building envelope against air and moisture penetration. By working with a DuPont Certified Installer, you not only get the assurance of a job done right—you also get the added support from DuPont, an industry leader, to ensure years of building performance of the weatherization products.

### **DuPont Weatherization Products 10 Year Limited Warranty**

The use of DuPont Weatherization Systems products combined with the 10-year warranty helps provide added assurance that your building will continue to protect an owner's investment now and in the future.

### **DuPont™ Tyvek® Specialist Network**

A national group of over 150 highly-trained field representatives is available to assist the Certified Installers with your installations. From the latest updates on building codes, to on-site consulting and training, your local DuPont™ Tyvek® Specialist will help make sure the job gets done right.

**To find out more information about working with a DuPont Certified Installer, please contact your local Dealer or DuPont™ Tyvek® Specialist.**
