

GORE™ Netcentric Products

COTS FOR MILITARY APPLICATIONS

Why Gore? You probably know Gore from our GORE-TEX® fabric. You may not be aware that Gore has been modernizing military fabrics and increasing effectiveness for fighting forces' combat units for more than 30 years.

Gore is not only a leading manufacturer of thousands of advanced technology products for fabrics, industrial, and medical markets; but also, Gore has a proven track record for high performance products for the computing and telecom industries.

We've helped data center industry giants manage transformation by:

- Allowing more architectural freedom via longer cable lengths
- Allowing more routability provided by the smaller cable size and weight
- Allowing 35-40% reduction in cable diameter and weight
- Allowing tighter bend radius

Gore products are available for high-performance computing and telecom industries. Visit gore.com to learn more about Gore's capabilities.
